It means much to the initiated to see how much it has cost an association to sell its stock. Small associations are handicapped where cars can chinery and equipment, \$625 in pronot be loaded full, for the growers must pay the freight for the difference between an acceptable minimum load and a short load. Four hundred forty eight crates are now taken as a load, although the belief is gaining ground that this is too much for proper refrigeration, buyers are generally gland, 8,450. shy of an overloaded car. "Top Tiers Soft" means faulty refrigeration. Already there are merchants who prefer and order four hundred twenty crates to the car. This may soon be accepted by the trade generally.

A freight allowance is no indictment of the quality of the stock; other allowances may be charged to delays in transit, or faults in loading or packing, or the quality of the fruit. As happened once or twice this year the growers have suffered loss by cars getting behind a washout. This is certainly an unavoidable delay.

The Ozark Fruit Growers' Association have this season shipped seven hundred sixty-five cars of strawberries
